

For the 2026–2027 Spring session, a waiting list may be activated for a limited number of candidates applying to programs in the economics and management area of the Undergraduate School. Eligible candidates will be informed by email when admission results are released.

At the end of the enrollment period, scheduled for 29 May at 3:00 pm (CEST), any places not confirmed by admitted students may be reassigned to candidates included on the waiting list.

Places assigned during the Spring session represent approximately 5–10% of the total number of available places; therefore, any places that may become available again will be limited.

Starting approximately from mid-June, the Admissions Office will contact by email the candidates on the waiting list who may receive an admission offer, based on:

- the number of places made available again;
- the programs selected by the candidate in the application;
- the ranking order.

In the event of an admission offer, candidates will be required to complete enrollment procedures and pay the first installment/deposit of €3,400 within a few days of the communication.

As the possibility of receiving an admission offer depends on several factors, the waiting list ranking position will not be disclosed, as it would not necessarily reflect the actual chances of admission.

Candidates with a lower ranking position may therefore be contacted before higher-ranked candidates if they selected programs for which places become available. Conversely, candidates placed higher on the waiting list may not receive an offer if no places become available in the programs indicated in their application.

Admission offers cannot be made for programs that were not included among the choices indicated in the application, and such choices cannot be modified afterwards.

Due to the high volume of requests, candidates are kindly asked not to contact the Admissions Office to request updates on their position or estimates regarding their chances of admission. The Admissions Office will contact only those candidates who may receive an admission offer.

For candidates who do not receive an offer, the outcome will remain non-admission and no further communication will be sent.
